

Business Activity – Log – Performance

Get to know your business... better!

Great managers make great decisions. With the right insight and given measure, the choices you make have superior impact. BALP gets you an opportunity to truly envision your business processes. To put it simply – you get the full picture.

No unknowns, no assumptions, no guesswork... for better end results.

01. WHY?

Operational efficiency can be defined as the ratio between the input to run a business operation and the output gained from the business. When improving operational efficiency, the output to input ratio improves.

"What's measured... improves"
— Peter F. Drucker

In order to improve operational efficiency, one has to start by measuring it. BALP is the perfect gauge.

Real-time dashboard view, updates as events are being received

02. WHAT?

UNIVERSAL AND ADAPTABLE

BALP is universal tool that can be used in a variety of situations and systems. Its backend can be linked to one or more different data sources – existing or created specifically for this purpose. Highly adaptable to your needs.

OPEN AND COST-EFFECTIVE

BALP is based on open-source technologies. As such, it is characterized by low introductory costs and is free of any vendor lock-in. No expensive licenses, no expensive infrastructure investments. Efficient use of existing commodity hardware, fast ROI.

03. HOW?

BALP provides end-to-end view of business processes for performance evaluation and early fault detection.

- Real-time data collection and aggregation
- Real-time data presentation
- Creating and sharing dynamic statistical reports (PDF, XLS, HTML)
- Reacting to predefined business events (sending information, running additional actions)

05. WHEN?

Now! Thanks to its modular structure, BALP supports gradual implementation – by stages. Be effective today, make even smarter decisions tomorrow.

06. WHO?

Applicable in the following businesses:

- Financial institutions
- Insurance companies
- Public administration
